Career Objective

Seek to join a technologically advanced organization where expertise in Information Technology, including network management, IT support, and data analysis, can be leveraged to contribute to improving the technological work environment. Aim to develop innovative solutions that enhance network security and provide optimal system performance, in addition to contributing effectively to strengthening cybersecurity strategies and providing continuous technical support. Believe in adding value through data analysis and making decisions based on accurate information, while adhering to the highest standards of quality and innovation. Aspire to work within a specialized and creative team in an environment that encourages challenges and professional growth, where technical skills can be used to achieve the organization's goals and contribute to its sustained success in a fast-changing world.

Education

Bachelor's in Information Technology | University of Tabuk | Graduation Date: May 2025

Professional Experience

Training Students at University of Tabuk | University of Tabuk | 2 Months – July 2024 – September 2024

- Collaborated with technical teams to resolve errors and ensure the continuity of academic operations.
- Developed and implemented technological solutions to improve system performance during training.
- Achieved a 30% improvement in the effectiveness of using remote learning tools among students.
- Increased the rate of solving technical problems on time by 18% through continuous training.
- Trained students on using network programs and analyzing data with technological tools.
- Reduced technical issues by 15% through system updates and continuous error analysis.
- Identified technical issues and analyzed them to find suitable solutions promptly.
- Provided technical support to students in using remote learning tools.

Training Courses

- **Engineering Practices for Building Quality Software** | University of Minnesota | November 2024
- **Object-Oriented Design** | University of Alberta | November 2024
- **Cybersecurity Awareness and Career Pathways** | University of Tabuk | October 2024
- **Presentations Design** | University of Tabuk | 2024
- **Endpoint Security** | Cisco Academy | July 2024
- **Introduction to Cybersecurity** | Cisco Academy | July 2024
- **Introduction to Internet of Things (IoT)** | Cisco Academy | July 2024
- **Excel Data Processing Basics** | University of Tabuk | 2024
- **Data Management and Governance** | University of Tabuk | September 2023
- **Cybersecurity and Technology** | Doroob (Human Resources Development Fund) | 2 hours | March 2021
- **Digital Skills Foundations** | Microsoft via Edraak | 2 hours | July 2021

Skills

Personal Skills: Teamwork | Leadership | Communication Skills | Deep Learning | Problem Solving | Time Management | Fast Typing | Negotiation | Organizational Skills | Strategic Thinking | Influence Skills | Project Management

Practical Skills: Network Management | IT Support | Data Analysis | Systems Integration | Emergency Response | Performance Optimization | System Testing | Backup Management | Access Control | Solution Development | Process Automation | System Updates

Technical Skills: Networking | Cybersecurity | Data Analysis | Data Analysis Tools | Python Programming | Network Security Tools | Object-Oriented Programming | VMware Tools | Operating Systems (Linux/Windows) | Network Management Tools | Cloud Storage | SQL Programming
